SAKATA[®]

Celosia Century Series

Spacing 4 x 4 inches / 10 x 10 cm. apart

SAKATA[®]

Celosia Century

Century Red – 39 inches / 1 meter

- **Celosia requires adequate potassium for good flower development. Finishing the crop with 15-10-30 (pot mum special) or potassium nitrate is highly recommended.**

SAKATA®

Celosia Century

- For natural season production in the Northern Hemisphere sow early April to mid-June for harvesting mid-July to mid-September. The early April sowing will yield the tallest stems due to 11 weeks of increasing long days prior to the days beginning to shorten on June 21st.
